-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 24 December 2003.  
 2a) This action is FINAL.                    2b) This action is non-final.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Iwane, US Patent Number 5,208,550 (hereinafter Iwane).

Regarding claim 1, Iwane discloses an RF amplifier comprising: an RF input; an RF power sensor to sense the power level of the RF input; an RF power level detector connected to said power sensor; a transmit gain control circuit connected to said level detector; a transmit chain/path and receive circuit; and a plurality transmit/Receive switches for time division duplex operation connected to said transmit chain and receive circuit [col. 5: lines 18-57].

Regarding claim 4, Iwane discloses an amplifier feedback circuit comprising: an RF energy input means for inputting RF energy into the amplifier feedback circuit; means for detection of said RF energy including the power level thereof; means for comparing said RF power level with an established threshold; means for controlling output gain of said RF power level; means for switching between transmitting and receiving power said switch means being operatively connected in a loop with said means for controlling output gain and a filter [col. 5: lines 18-57].

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Iwane, US Patent Number 5,212,814 (hereinafter Iwane).

Regarding claim 1, Iwane discloses an RF amplifier comprising: an RF input; an RF power sensor to sense the power level of the RF input; an RF power level detector connected to said power sensor; a transmit gain control circuit connected to said level detector; a transmit chain/path and receive circuit; and a plurality transmit/Receive switches for time division duplex operation connected to said transmit chain and receive circuit [col. 2: lines 11-30].

***Allowable Subject Matter***

4. Claim 5 is allowed. Prior art has not been found that suggests or renders obvious the disclosed equation for maintaining constant output from an RF amplifier.

5. Claims 2, 3, and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Muurinen, US Patent Number 5,291,147, discloses a power booster for a radio telephone.

Art Unit: 2681
